Camp Snoopy - Mall of America

“Our cashiers really like the POS system. It’s much faster and easier to use than the old system and helps them to provide a superior level of guest service. From a management point of view, cashier-training is now far quicker and more effective than before.”

Chris Lake-Smith, Director of IS

Solutions for Camp Snoopy, the largest indoor theme park in America, were implemented in May of 2003 and encompassed seven retail locations and sixteen food venues. Using PC/Register, Enterprise and Warehouse, Camp Snoopy is able to interface to their Food and Beverage system, Cash Management system, Ticketing system and HR system to support the entire enterprise. They also use the MAS 200 accounting interface and Shift4 credit card processing interface.

Retail Anywhere provided project management, system implementation, data conversion, all system interfaces and system training services during implementation and continues to provide convenient help desk support.

Camp Snoopy was looking for more flexibility and additional functionality for POS.

- Retail Anywhere Software used: PC/Register Touch, Enterprise, Warehouse, Shift 4 Interface, Mas200 Interface
- Retail Anywhere Stores: 23 total, 7 retail stores with PC/Register, 16 food stores integrate Retail Anywhere Enterprise
- Number of Retail Anywhere POS Stations: 16
- Number of Retail Anywhere Enterprise Users: 16
