

Multi-Channel Retail Made Manageable

You need an easy-to-use point of sale and retail management solution that helps your business run more profitably. We understand.

Retail Anywhere's POS and retail management suite offers a powerful system of integrated software and services to help you do just that: give your business a competitive edge in today's demanding retail environment. Our advanced tools, user-friendly interface, and roll based dashboards allow you to easily manage and monitor all aspects of your retail operation. And our on-demand, pay-as-you-go SaaS model allows for minimal upfront costs, lower operating costs, and streamlined IT staff.

Whether you are executing a promotional campaign, tracking inventory in real-time throughout the retail chain, or managing your eCommerce site, Retail Anywhere's complete solution provides you the power you need to manage your business with ease.

Best of all, Retail Anywhere's solution is modular and scalable to grow with you as your business grows. Add eCommerce when you're ready, or deploy Mobile POS during the busy shopping season. With Retail Anywhere, you'll experience a one-stop solution backed by a friendly staff of experts eager to help your business succeed.

Discover what's
In store for you

Multi-Channel Retail Solution

Retail Anywhere brings together the best software, hardware, and professional services to meet the needs of today's retailer.

Point of Sale

Built upon Microsoft .NET, Retail Anywhere POS provides the functionality to deliver enhanced customer service while increasing efficiencies and revenue

opportunities. With an easy-to-use interface, the POS provides a quick, accurate check-out process, time and attendance tracking, biometric integration, and returns management functionality to help streamline business operations. Retail Anywhere's POS solution gives you greater item search capabilities with real-time access to inventory throughout your retail chain. Meanwhile, our built-in CRM functionality captures important customer information such as buying preference and purchase history, which allows for targeted promotions while strengthening customer loyalty.

Mobile POS

Our mobile POS solution incorporates the functionality of our traditional POS workstation with the conveniences of a mobile device. Store managers can spend more time on the sales floor with customers while performing complete sales transactions, locating out-of-stock items, and receiving inventory.

eCommerce

Deliver true cross-channel retailing with integrated eCommerce. Leveraging NetSuite's cloud-based ERP platform, you have everything you need to put your retail business online and provide an intuitive, "Amazon.com-like" experience to your customers. Capabilities include easy-to-use site building tools, secure shopping cart functionality, real-time credit card processing, coupons, cross-selling, and customer self-service. With self-service, shoppers can track packages, review their purchase histories, manage returns, re-purchase products, and so much more.

Merchandising and Inventory Management

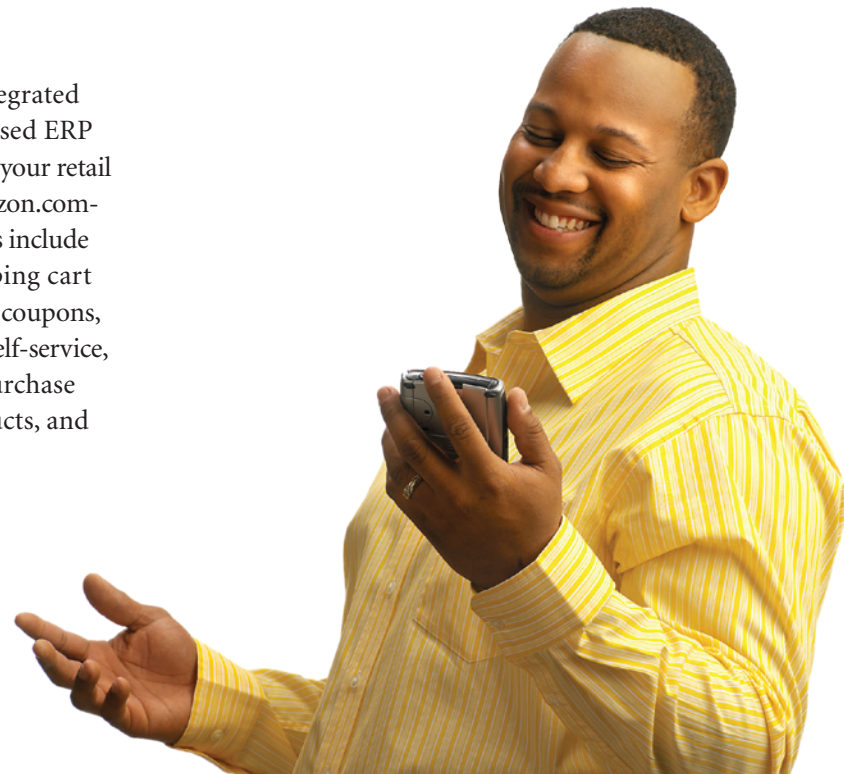

With a merchandise management solution from Retail Anywhere, you can efficiently analyze, order, price, and distribute merchandise across your retail channels. Having the right inventory at the right place at the right time, while optimizing for promotion and pricing of products, maximizes sales and reduces the need for future markdowns.

Financial Management

The ERP platform with NetSuite gives you an on-demand, proven financial management solution that includes general ledger, accounts receivable, accounts payable, fixed asset management, cash flow management, financial reporting, and more. Easily automate and streamline accounting processes with real-time visibility into the financial performance of your entire retail enterprise.

Warehouse Management

Our flexible warehouse management solution ensures the accurate flow of merchandise from receiving, through distribution, to store delivery. To improve productivity and minimize out-of-stocks, our warehouse solution includes functionality for order processing, replenishment, product allocation, landed costs, lot and bin management, barcode printing, and transfers.

Full service solutions with seamless integration.

Business Intelligence and Reporting

Easily analyze and report on the data generated throughout your retail chain with Business Intelligence (BI) tools from Retail Anywhere. The BI tools give you control of data across your enterprise, enabling you to make better business decisions more rapidly.

CRM & Marketing

With a 360 degree view of every customer in every channel, Retail Anywhere's CRM provides the insight you need to deliver personalized service, build customer loyalty, and increase revenue. Leveraging a single data source and centralized CRM, our solution enables you to track and segment customers to deliver personalized marketing, create 1:1 offers, target segmented groups to encourage repeat business and increase average sale size, and offer instant promotions at the POS.

Apps

Take advantage of innovative third party applications that easily integrate with our platform and add value to your retail management solution. Applications for advanced planning, tax management, shipping, EDI services, and many more are readily available.

Services to make it easier

SaaS

Retail Anywhere's Software as a Service model saves you time and money by providing a complete software solution with critical upgrades, maintenance, and support. Our SaaS solution is a combination of on-demand and on-premise software with minimal upfront cost and low monthly fees, while reducing the strain on IT resources.

Professional Services

We understand the importance and complexities involved in creating, deploying, and supporting your retail management solution. Our professional services team manages each project from beginning to end so you can focus on your business.

Software Modification

Cookie-cutter solutions don't work for today's businesses. Retail Anywhere modifies our software solution to your specific needs, saving you time, money, and a lot of hassle.

Help Desk

If you ever need it, the Retail Anywhere support team is standing by 24/7 to answer questions and solve problems.

Software Integration

We understand the need for seamless integration. Retail Anywhere will work with you to integrate our solutions with your existing systems to deliver the ideal solution for your business.

System Training

Retail Anywhere ensures your business can harness the power of your new retail solution with flexible training options to suit your business' needs.

Implementation

To ensure a seamless, worry-free transition, our team works diligently to make sure your retail system is installed on time, on budget, and performs according to plan.

Why Retail Anywhere?

Retail Anywhere understands how important and complex it is to create, deploy, and support technology solutions for multi-channel retailers. We believe individual service is the key to meeting your needs so your business can succeed. And we're here to help.

The Right Experience

Retail Anywhere has been providing retail management systems for 28 years. After over 35,000 installations, our technology and solutions have evolved, but our dedication to great customer service remains the same.

The Right People

The Retail Anywhere team is made up of knowledgeable and friendly experts dedicated to the success of your retail business. We speak your language and stay with you every step of the way, from implementation to adding new stores and divisions, to training new staff.

The Right Platform

Retail Anywhere integrated its best-in-class POS with NetSuite's cloud computing ERP platform, unlocking a multi-channel retail management suite that is the most comprehensive solution for retailers. While ERP, back-office solutions are hosted in the cloud, Retail Anywhere POS remains an on-premise solution, leveraging Microsoft's .NET and SQL technologies, and is certified ARTS Data Model Conformant.

The Right Integration

As a NetSuite SuiteCloud Developer Partner, Retail Anywhere not only integrated its best-in-class POS with NetSuite's Cloud ERP, but also extended the NetSuite platform to incorporate additional retail functionality to further support the needs of multi-channel and multi-location retailers. NetSuite solutions enable retailers to transform and unify their business performance and processes, while slashing IT costs and increasing access to the information a growing business needs. NetSuite develops an intelligent, integrated, and simpler ERP.

Hear from Our Customers

Rocky Mountain Chocolate Factory

"Retail Anywhere lets us analyze information across our locations to better understand retail trends and develop programs to impact retail operations. Access to data such as product mix, pricing, labor, customer information, and promotions has helped us improve store performance. We have developed a team of retail analysts to work with this data and help our franchisees implement programs that improve their bottom line." —Key Jobson, CIO for Rocky Mountain Chocolate Factory

Sanrio

"The Three Apples exhibition would have been economically and technologically challenging with our legacy POS system. Implementing Retail Anywhere solutions and services gave us the flexibility and reliability we needed to efficiently sell, manage inventory, and satisfy thousands of Hello Kitty fans during our North American Event." —David Marchi, Brand Marketing Manager for Sanrio

Peek...Aren't You Curious

"We feel that Retail Anywhere's solutions afford us detailed, real-time views of product life cycle, product movement, channel performance, and consumer behavior that ultimately allows Peek to continue to innovate and grow." —Bob Graham, CIO for Peek...Aren't You Curious

Nakajima USA

"Having a SaaS solution model and lower upfront costs was a huge factor in our selection of Retail Anywhere's POS and complete retail management system. Their pay-as-you-go model enables us to quickly engage in the project, while their solution suite delivers the tools and functionality we need for retail success". —Jennifer Pearce, Director of Corporate Stores for Nakajima USA
